+1 855 ACQUIP1

ACQUIP proudly introduces our new 3D scanning services. Faro's Focus 3D advanced technology allows you to accurately capture As-Built conditions in any environment. ACQUIP is able to simulate components in 3D for installation purposes, as well as perform design validation and reverse-engineering. The post processing of scanned data even makes it possible to easily inspect structural deflection on complex surfaces in small spaces.

- The ACQUIP Services – 3D Laser Scanning Benefits:
- High speed 3D advanced technology
 - Long range capabilities for easy measurement of large rotating equipment
 - Minimizes production downtime and prevents mistakes
 - Highly accurate to provide dependable results
 - Eliminates rework, which means cost-effective processes
 - Fast enough for data management

ACQUIP Powered.Empowering™
